3. Stephanie with her Halo Light.

Lighting Girl

Fast cementing a place as one of our most innovative lighting designers, Stephanie Ng recently won this year's Concept Award for her "Halo Light" at The Edge for the Australian International Furniture Fair and has just been included in the Workshopped13 for her super stylish "Scoop" range. We particularly liked the snug little range of woven lighting called "Luna Lana" she made exclusively for Design.Made.Trade. Stephanie challenged herself to make a new style from "old technology". Each piece is handmade from 100% merino wool, but don't try making one at home, she developed specially selected and treated materials to ensure they are safe to use.
